Voice

IDENTITY

Logo

The mark is a speech-bubble “scroll” frame with three typing dots — two neutral, one in Clarity Orange — paired with the “BT Servant” wordmark. Use the full lockup whenever there's room; the mark alone is reserved for small spaces (favicons, avatars, app icons).

Primary lockup — on light backgrounds

Reversed lockup — on dark backgrounds

The mark alone, without the wordmark. Used for favicons, WhatsApp/social avatars, and anywhere the full lockup won't legibly fit. Never pair the icon-only mark with a restatement of the name right next to it — that duplicates the wordmark's job.

Live-text wordmark · Inter · for contexts that can't use the logo image (plain-text email subjects, meta titles, in-app headers, code comments)

BT Servant

BT is always Inter 800 (Extrabold); **Servant** is always Inter 400 (Regular) — matching the site's own `.site-logo__word` rule. Never set both words at the same weight.

DO

- Keep clear space around the mark of at least the height of the “o” dot on every side.
- Use the light-background lockup on white/paper surfaces, and the reversed lockup on charcoal/navy surfaces.
- Scale the lockup proportionally; keep the wordmark legible at a minimum width of ~90px.
- When the wordmark must be set as live text, keep “BT” bold and “Servant” regular — never both the same weight.

DON'T

- Stretch, skew, or squash the lockup.
- Recolor the mark or dots outside the approved palette.
- Place the light-background lockup directly on a busy photo or pattern without a solid backing plate.
- Shrink the full lockup so small the wordmark blurs — drop to the icon mark instead.
- Set “BT” and “Servant” at the same weight when typing the name out — the imbalance is intentional.

PALETTE

Color

The live site locks in the “carbon” theme: near-black charcoal, a single Clarity Orange accent, and warm off-white paper. Orange is used sparingly — for the logo's third dot, CTAs, and small emphasis marks — never as a large fill.

TYPE

Typography

Newsreader (serif) carries headings and moments of warmth — its italic is the one place personality shows, used for the rotating hero line. Inter carries everything functional: body copy, navigation, buttons, labels.

Newsreader · weight 500 · headings

BT Servant equips disciples

Newsreader · italic 600 · Clarity Orange · emphasis / rotating line

to understand God's Word.

Newsreader · weight 500 · section titles

Available wherever you serve.

Inter · weight 400 · body copy

Ask in text or voice. Get trusted, context-aware guidance — inside the apps you already use.

Inter · weight 600 · uppercase, tracked · eyebrows/labels

Components

Pill-shaped buttons, soft-cornered cards, and a single consistent shadow token keep the interface calm. Four button styles cover every use case — there's no fifth.

Spacing & Shape

TOKEN

VALUE

USED FOR

--container

1120px

Max content width

--radius	10px	Cards, panels, input-style surfaces
--radius-sm	6px	Small chips / tags
Button radius	999px	All buttons — always fully pill-shaped
Section padding	78px vertical	Space between homepage sections
--shadow	0 1px 3px rgba(20,18,40,.07), 0 10px 28px rgba(20,18,40,.06)	Hover states, active cards, floating panels

PRODUCT IMAGERY

Screenshots & Mockups

- Product conversations are always shown as **mobile** WhatsApp screenshots — status bar, back arrow, avatar, name — never a desktop/web chat window.
- The header shows the logo mark and **“BT Servant”** only — no subtitle line under the name.
- Conversation content is real and specific (actual questions, actual BT Servant replies) — never placeholder Lorem Ipsum text.
- Cards that hold a screenshot fade out toward the bottom rather than cropping mid-sentence, implying “there's more — keep scrolling in the app.”

INHERITED FROM UNFOLDINGWORD

Voice & Tone

BT Servant is a project of unfoldingWord and follows its parent voice — “The Trusted Guide.” BT Servant has no separate documented voice of its own, so this section carries the org-level framework through rather than inventing a new one.

Humble, not heroic

Elevate local churches and translators; BT Servant is a tool in their hands, not the hero of the story.

Clear, not complicated

Plain language. Define jargon. Match the site's own copy: short sentences, concrete verbs.

Faithful, not flashy

No hype. The copy earns trust with specifics (real resources, real orgs) instead of superlatives.

Hopeful, not naïve

Honest about the hard work of translation; grounded in what God is doing through it.
